Dear Potential SBIS Clients,

Connection and positive relationships are the foundation to building a strong bond of trust between educators and students. Often when we experience a breakdown in trust, frustration and negativity can overtake a once healthy experience resulting in negative behaviors in the classroom.

At Safris Behavioral Intervention Services (SBIS) our core belief is centered around working toward creating and maintaining strong and trusting relationships across the educational setting. This connectivity fosters an environment where students who struggle with behavior can learn to trust, develop confidence, and strive to work to make better choices.

Every plan written, professional development delivered, and coaching approach begins with meeting each individual in the equation where they are in the process. Every person is accepted for who they are and celebrated for what they can offer to support the journey toward more positive behaviors and outcomes in the classroom.

SBIS has been serving schools, educators, students and families since 2020 with proven success. Whether you are looking to support individual students, groups of students, individual teachers or your entire staff; we are here and ready to help as each child works to find success on their educational journey.

How can we help your students be more successful on their educational journey?

Jodi E. Safris, MEd
